Alto Rural Water Supply Corporation is issuing a boil water notice for customers on Highway 21 West, FM 220, CR 2807 and CR 2902 because we had a leak. To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking and making ice should be boiled and cooled prior to use. The water should be brought to a vigorous, rolling boil and boiled two minutes. When it is no longer necessary to boil the water, the water system officials will notify you the water is safe for consumption. If you did not lose water or have low pressure you don't have to boil the water. If you have any questions, you may contact our office at 936-858-4648.
